E# 2013-2014

As in previous seasons, I'll be updating the E# for all the teams in the Championship this year.
If you've not seen it before, this is essentially how it works:

"E#" is the "Elimination Number" for each team that is not leading the league.

The elimination number of each team can be defined as:
"The combined number of:
a) wins for the leading team and
b) defeats for the specific trailing team
that are required for that trailing team to be unable to overhaul the leader"

This means any win for the leading team reduces all E#s by one. Any defeats suffered by trailing teams reduce their own E# by one.
So a win for the leader combined with a defeat for a trailing side would reduce their E# by 2. A defeat for the leader and a win for a trailing side would leave their E# unchanged.
(As a win is worth 3 points and a draw is worth 1, a draw for the leading team reduces all other E#s by a third. A draw for any trailing side reduces their own E# by two thirds.)

Changes for 2013-2014

There are 3 'vital' boundaries in the league, i.e:
1st/2nd (Champions/2nd)
6th/7th (Playoffs/No Playoffs) and
21st/22nd (Safety/Relegation)

With this in mind, I've made 3 tables (above). The team or teams lying ABOVE the border (darker shading) have an E# that represents the number of appropriate results that will ENSURE a final position of Winners/Playoff spot/Safety.

I've also put the E# tables alongside a current actual league table for easy comparison.
