

Quota/Usage Inspection

1. Quota defines project-level maximal simultaneous resource allocation (implicitly defines “money burn rate” and workflow speed at scale); eg. disk, CPUs
2. Tasks not-running may be a symptom of full-quota usage
3. Go to “Google Cloud Console”
 - a. Search “Google Cloud Platform Console”
4. Select Desired Project
5. Enter “Quota” in the search box and hit “All Quotas”
6. Scroll to see various quotas/usages
 - a. Consider selecting “All Quotas” from dropdown selector
7. To request quota increase for a *project* please write to “help@firecloud.org”

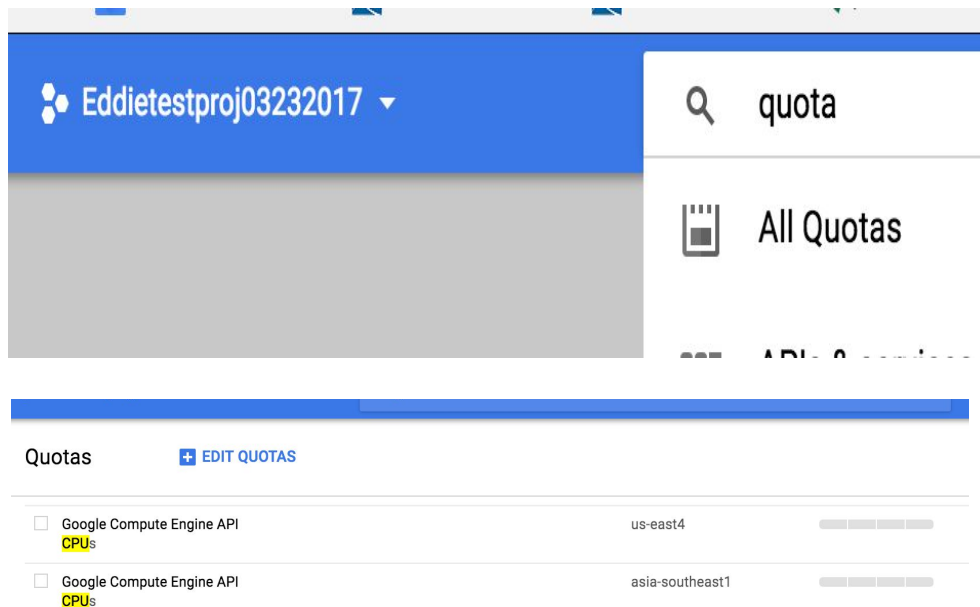

Google Cloud Platform

<https://console.cloud.google.com/> ▾

Google Cloud Platform lets you build, deploy, and scale same infrastructure as Google.

Google Cloud Platform Console

Use the Cloud Platform Console to manage your resources if ...

The screenshot shows the Google Cloud Platform Console interface. At the top, the project name 'Eddietestproj03232017' is displayed. A search box contains the text 'quota', and a dropdown menu is open, showing 'All Quotas' as the selected option. Below the search box, there is a table of quotas. The table has a header 'Quotas' and an 'EDIT QUOTAS' button. The table contains two rows of quota information.

Quota	Region	Usage
<input type="checkbox"/> Google Compute Engine API CPUs	us-east4	Progress bar
<input type="checkbox"/> Google Compute Engine API CPUs	asia-southeast1	Progress bar
