The Famous Hurricane WIDEBODY

Jim Wynne, former world racing champion and inventor of the I/O engine is noted for his stable riding deep-v hull designs. His engineering and design contribution to the Hurricane WIDEBODY was extensive. You can be assured a dry, comfortable ride and superior handling characteristics in a WIDEBODY.

Importantly, the Hurricane will give you better performance

with moderate horsepower engines than many other boats in our class. And, many features that are options on other boats are standard on a Hurricane.

We believe you will find your new WIDEBODY built to the true quality standards you can expect from GODFREY MARINE.
