Alufiber® Construction

Alufiber® combines aluminum with fiberglass to create the most durable finish available in the industry. *Alufiber*® has a high-gloss automotive finish and is easier to clean than traditional fiberglass and aluminum finishes. Plus, it contains a UV resistor to reduce yellowing and fading.

The RV with Personality

T@B

One look at T@B and you will understand why so many people have fallen in love again with RVing.

The retro teardrop design of yesterday meets today's technology.

T@B is designed to be lightweight, easy to tow and even easier to set up and use. The base weight of T@B is less than 1650 pounds and can be towed by most family cars, SUVs and light trucks.

T@B's 5' 9" interior height allows most people to stand up. Plus, T@B features a fully functional kitchen with a range and sink. It's also available with a refrigerator, LP furnace and an air conditioner with a heat pump.

T@B's interior storage space is amazing. Every floorplan has been designed to maximize storage and provide a comfortable kitchen, living area and sleeping space.

But, it's not just T@B's unique shape and terrific interiors that people love; it's also the technology that makes it one of the best values in the industry.

T@B features an ultra-lite body design and an ultra-lite weight chassis. The body is fully laminated with *Alufiber*®, the industry's newest material. Its high-gloss finish is designed for years of durable use. Plus, T@B includes double-pane, shatter-resistant windows, a parking brake and integrated surge brake coupler.

So, are you ready to express yourself with T@B?

Just personalize your T@B by picking your favorite floorplan, body color, trim color and decal package.

Fun and adventure has never been so simple.

Fresh Water Capacity (gal)	5	5	5	5
LP Capacity (lbs)	20	20	20	20

Vehicle loading - Every effort has been made to provide the greatest number of options for the recreational vehicle owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices that they remain within the manufacturer's specified chassis weight limits. Do not overload the recreational vehicle.

Dry weights based on standard features - Some optional equipment not included. Net carrying capacity (NCC) is determined by subtracting unloaded vehicle weight (UVW) from gross vehicle weight rating (GVWR) and includes fluids, options and cargo. Liquid capacities and weights are approximations only. This information is intended as a guide only. Weights of individual vehicles may vary. Consult your owner's manual for complete loading, weighting and towing instructions.

What For You!

T16-CS

"Clam Shell"

The T@B Clam Shell model has a slightly different body than other T@B floorplans. As a result, a few options and standard features are different than the other models. Below is a list of product differences:

1. The colored body trim on T16-CS is only available around the windows and wheel wells.
2. T16-CS includes two grab handles on the front of the unit only.
3. A 12 Volt refrigerator is available as an option on the T16-CS. The three way 12V/110V/LP refrigerator is not available on T16-CS. An extra storage cabinet will be placed in the rear kitchen of T16-CS if the 12V refrigerator option is not chosen.
4. A LP bottle cover is not available on the Clam Shell.

T16-CS Front

T16-CS Back

Optional Features

Add a Room Tent
(NA on Clam Shell)
