

TYPICAL INSTALLATION

Hoses picture 320S 3020HE

A

Flow Assembly with automatic air bleed valve, and non-return valve to prevent auto-circulation of central heating

Circulation pump

B

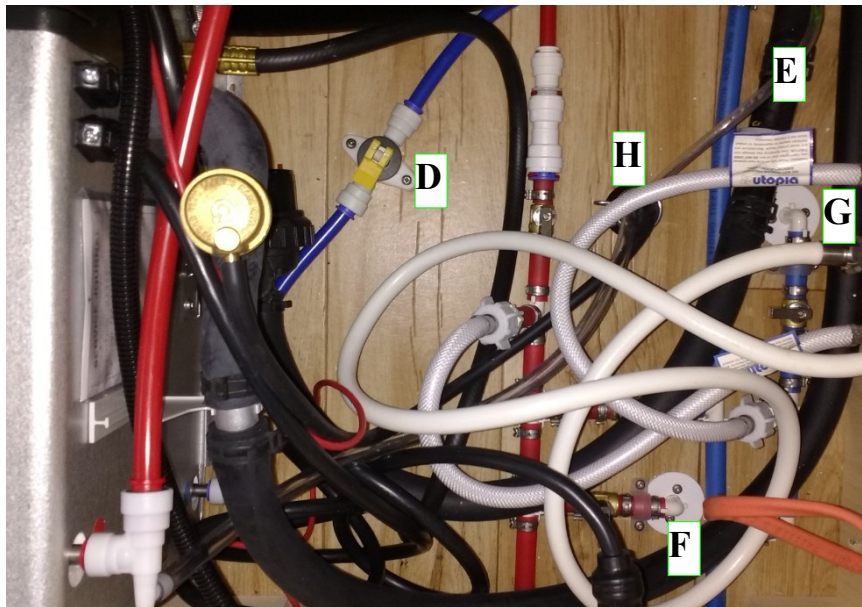

C

Hot Water connection built-in non-return valve which allows air in when the heater is drained.

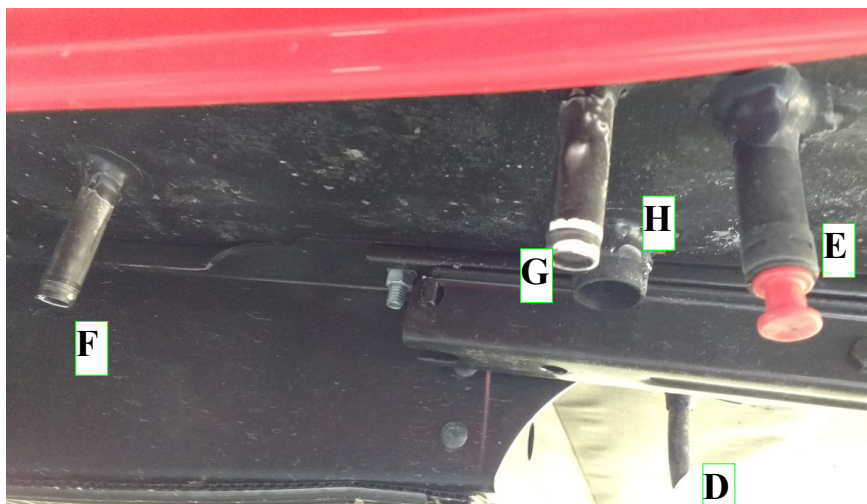

D

Safety valve and drain cock. The safety valve opens at 50 psi. When draining water from the heater, the yellow lever is pushed upwards

Glycol Drain

E

F Hot Water Drain

G Cold Water Drain

H Air Vents,
Hot Water at Boiler
Glycol at Flow Assembly
Glycol Tank
