

HTML5 problems

2 things are more complicated when using the html5-beta-version of BF.

### 1. Choosing how many to sell

I want to collect pigs and get this:

Then in the flash version I carefully place my mouse to the left, before 1, and clicks: |10

And then I write 22 and click on selling. Then I have sold 2210 pigs.

In the html, I place my mouse as before, and clicks: 10|

If I write 22 and click on selling, I sell 1022 pigs. If I want to sell 2210 pigs, I must choose the arrow-left twice.

### 2. Equipping my boats

I see this window and want to equip my boat:

In the flash version, I hold down the Shift-button and left-click on Brigitta 6 times.

This is not possible in the html5 beta version. Here I must click on Brigitta, hold down the mouse, drag her to a free field and let go the mouse. 6 times.

This is very annoying and is the reason that I soon stopped using the beta version.

Yours,

bjens (nordic server)
