
192.168.20.220 client can connect via the L2TP VPN to 192.168.1.199 and RDP without issue. I can ping 192.168.1.199 from 192.168.20.220 but cannot ping192.168.20.220 from 192.168.1.199. I need to be able to do that. Windows Defender is disabled on both ends for testing. I believe a route is needed.
