

1. NSA325 v2

The screenshot shows the ZyXEL NSA325-v2 web interface. On the left is a navigation tree with sections like Status, System Setting, Storage, Network, Applications, and Maintenance. The main panel is titled "System Setting - Firmware/Packages". It has tabs for "Fw Upgrade" and "Package". Under "Firmware Upgrade", there's a note about upgrading the binary (.BIN) file. A "Firmware File" input field is present, with a placeholder "Alege fișier... Nu ai sănătatea fișier". Below it are "Upload" and "Next" buttons. A note says "SYS led will blink orange while FW is upgrading. Please do not power off NSA while FW is upgrading.". There's also a "Check for Latest Firmware" section with a checkbox for "Periodically Check for Latest Firmware Automatically" and an "Apply" button. A message at the bottom says "Last check was on 2020-01-16 15:31:10" and a "Check for Latest Firmware Now" button. The status bar at the bottom shows "Message Ready" and the system time "12:35 PM 1/17/2020".

2. Php Mysql PhpMyAdmin & Wordpress

The screenshot shows the ZyXEL NSA325-v2 web interface with the "System Setting - Firmware/Packages" tab selected. The left sidebar includes sections for System Setting, Storage, Network, Applications, and Maintenance. The main area is titled "Package Management" and contains a table of installed packages. The columns include Name, Status, Description, and Version. The table lists several packages:

Name	Status	Description	Version
DyDNS	Not Installed	This gives your NAS a domain name with a dynamic IP address.	0.01zyapk008
Gallery	Not Installed	This web-based application allows your NAS to host pictures. Use the NAS administrator credentials to log in. The administrator can then create accounts for other users.	3.0.4zyapk007
GoogleDriveClient	Built-in	This offers service of 2-way synchronization between NAS and Google Drive.	0.4.0zyapk002
Mempal	Not Installed	Mempal is online backup and online storage software that archives your files in real-time.	2.4.4zyapk203
NFS	Not Installed	NFS (Network File System) is a file-sharing protocol most commonly implemented on Unix-like systems.	1.1.4zyapk208
NZBGet	Not Installed	This package downloads .nzb file from Usenet. Default username:nzbget	11.0zyapk004
