

UPGRADING TO THE NEW MP PLOTTER HAS NEVER BEEN EASIER OR MORE AFFORDABLE.

Infinity and XLp owners can **save up to 30%** off the cost of a new GERBERplotter™ MP Series plotter when you trade up through our Loyalty Programs! Starting in October 2018, Gerber will no longer be supplying service and aftermarket parts for your existing XLp and Infinity plotters so we are offering you amazing deals when you upgrade today!

All GERBERplotter MP Series components are designed to withstand even the toughest manufacturing environments, using precision-crafted aluminum and injection-molded parts.

Efficient Production

Produce as many as 180 meters per hour for full widths at 300 DPI resolution.

Minimizing Material Costs

Reliably print on paper as light as 20 grams, a materials savings of over 50%.

Quiet Strength

Operate at a volume of under 40 dB.

More Uptime

Keep production up and running smoothly with a low-cost, easy-to-use preventative maintenance kit.

Long-Term Durability

Withstand even the toughest manufacturing environments with precision crafted aluminum and injection molded parts.

With a smooth look, sealed structure, small footprint and quiet operating volume of less than 40 dB, the MP Series is ideal for the trendiest office spaces or the grittiest production floors.

For a limited time, get 6 months of free service when you trade up!

Not using your current Infinity plotter? Let us take a few parts* from your old Infinity plotter and we will give you a 6-month full service agreement that includes on-site labor and repair parts.**

* Parts only. Customer responsible for removing entire machine afterwards.

** For a limited time only, so act fast!
