6. Select Save File

Select where you would like to save the file to (I recommend the desktop, or by default it may go to your downloads folder)

Once the file has finished downloading you can close all windows

Once the software has downloaded you will need to extract the files, I recommend making a separate folder on your desktop, put this downloaded zip file in that and

extract the file there.

Once the files are extracted you will be able to install the software.

Note: if you have an antivirus program, be sure to include the software download location in the Exceptions list and disable the antivirus program temporarily before installing.

Select the Autorun.exe.
