V7.7 Release Notes

YPLM#	Feature List
719	Admin Folder: The new system configuration setting <i>StyleMaterialsReadFromLib</i> , located in the Admin Folder, auto updates the BOM Material information once the material header is saved within the material folder. Batch Update is not required for this setting to work.
662	Application Configuration: The out of the box Care Control Panel entries are now available to be used as field configurations across the application.
670	Application Configuration: The Style Care workflow page is now configurable.
667	Application Configuration: The Style Bill of Material workflow page is now configurable.
671	API Integration: The Style BOM workflow page now contains additional API support.
675	API Integration: The Style Seasonal Colorway area now contains API support.
676	API Integration: The Style Look book area now contains API support.
666	Batch Queue: The Batch Queue area now allows users to download multiple Tech Packs at once after mass creating Tech Packs.
729	BI Folder: The attachment expiration dates report has been updated to include the Resource Folder attachments.
683	BOM: Updated the BOM LIN column from a radio button to checkbox which allows for multiple selections.
329	Control Panel: Updated the Control Panel > Tech Pack > Predefined Sample Request Reports to now display the Report name vs the Report File name, making it easier to know which print option you're selecting.
516	Control Panel, Measurement Page: The Control Panel now contains a new Fraction Conversion page which allows a user to define any Fraction to Decimal values that may be needed as part of the user's measurements and grading. Example Support for 32 ^{nds} .
668	Control Panel, Material Request, Sample Request: The new addition of the Ship Method area within the Control Panel allows users to configure a shipping carrier and tracking URL.
669	Control Panel, Style Folder, Tech Pack: Users can now designate printout options when creating a Style sub-workflow page. This will override a predefined tech pack page selection.
764	Control Panel, Style Folder, Workflow: An Admin can predefine sub-workflow pages within the Control Panel > Dev Workflow area for use as default workflows pages when a Style is created.
689	EULA: The End User License Agreement now supports multiple languages. A new user's designated language determines how the EULA is displayed. Upon user creation, the Administrator must specify the user's language for the EULA to change. The following

Yunique PLM 7.7 Release Notes

	languages are supported: English – US and UK, Spanish – Mexico and Spain, Portuguese, Italian, German, French, Chinese.
660	Line List: A new Sample Request Header Flash Edit allows the user to mass edit sample request header information for Styles included in the Line List.
663	Partner Folder: The Partner Folder now provides users with the option to add attachments within the Attachment section.
664	Resource Folder: The Resource Folder’s attachments area now contains new expiry date fields.
665	Resource Folder: The Resource Folder attachments now contains a new field selection ‘Include in Resource List’ which will display any selected attachment in a new dropdown field on the material header.
661	Sample Request, Style Measurement: The stated workflow areas now contain the excel export functionality.
672	Sourcing Folder: YuniquePLM can now manage freight by country of origin, or by a supplier with a new freight handling rate Control Panel entry.
674	SRMOn: Partners who have access to shared workflow pages can create and edit the measurement and text-image workflow pages directly in SrmOn. This is available when the new system setting is enabled, <i>EnableSrmOnPageAddAndEdit</i> .
656	User Profile: The user profile page now provides a button directly linking the user to the Gerber Community site.

YPLM#	Defect List
342	Admin Folder: Corrected an issue where a wrong translated language was placed in an OOTB field.
367	Admin Folder, Language Support: Fixed an issue where words were not correctly translated because of a space at the end of a word.
487	Admin Folder: Corrected an issue where the decimal separator (,) for UK English did not update within the Style Costing page. When changed from a period to a comma an “invalid currency format” error was received.
489	Admin Folder: Corrected an issue where a user with no permissions to the Silhouette Folder still had access.
531	Admin Folder: Corrected an issue where the system setting, BOMAllowInputMaterialPrice, did not function correctly.
697	Application Configuration: Corrected an issue in the Line List Flash Edit area where the EAV fields were not editable.
884	Application Configuration: Corrected an issue when a client lost their EAV configurability within the Line List after upgrading to version 7.6.
885	Application Configurability: Corrected an issue with the Line List New Style area EAV Configurability status fields.
389	BOM: Corrected an issue where the Style BOM did not automatically refresh after a Line List was created.
715	Control Panel: Corrected an issue where the Control Panel EAV Field Width entry defaulted to 150px regardless of a specified amount.
745	Costing Page: Corrected an issue where the Style Costing page did not function correctly when the user language was set to Dutch, Spanish or Portuguese.
594	Image Folder: Corrected an issue where Mac OS 10.13.4 Safari users were unable to upload images to YuniquePLM.
418	Line List: Corrected an issue where users were able to enter duplicate Style numbers within the Line List’s Style Header Flash Edit area. As a result, the duplicated Style numbers were shown within the Style Folder.
886	Line List: Corrected an issue where adding a subcategory to the Style Flash Edit area did not work correctly.
270	Material Folder: Corrected an issue where making changes within the Material header fields were not tracked within the change log.
696	Material Request: Corrected an issue where a SrmOn Partner was able to modify a Sample after it was approved.

Yunique PLM 7.7 Release Notes

517	Measurement Page: Corrected an issue on the Style Measurement page where re-linking a modified grade does not pull the description, tolerance or grade.
528	Measurement Page: Corrected an issue where the Measurement Graded Spec report, accessible from the Style Measurement Preview list, displayed inactive and hidden sizes.
787	Quote Folder, Sourcing: Corrected an issue where updating a Quote in a Batch Update actually opened the quote.
716	Sample Request: Corrected an issue within the Sample Request – Sample Summary tab where the image in the 1 st position is not shown.
412	Sourcing: Corrected an issue where clicking on an emailed quote link only showed user’s the Quotation Edit view and not the Style.
558	srmOn: Corrected an issue where an srmOn user had visible access to ALL agents, vendors and factories regardless of their designated list.
390	Style Folder: Corrected an issue where a Style with EAV fields did not copy all field data when a style variation is created or a style is copied.
743	Application Configuration: Corrected an issue within the EAV area of the Style Folder Search Grid where the Design Contact selection is unavailable for editing.
490	System Configuration: Corrected an issue with a Field Configuration where entering a true/false field type resulted in the default value not working properly.
