Feature	Description	Value-add for admins	Value-add for employees
Realtime policy compliance notifications	Swipe your card and we'll notify you if you're missing any important transaction details, so your expenses are submitted on time, every time.	Proactive control over expense policy compliance, including custom limits on unapproved expenses	Instant notification after swiping if a receipt or expense details are required
Continuous reconciliation	Card transactions import immediately into Expensify and reconcile automatically with QuickBooks Online.	Less time spent going back-and-forth between Expensify and your accounting package	No accountant or admin interaction
Daily settlement	Employees can only spend the money that's available in the company bank account.	No more worrying about a supersized bill at the end of the month, because your clients' finances are up-to-date every single day	Employees don't have to put their personal credit on the line to receive access to a company card.
Maximum eReceipt coverage	You only need to capture receipts for the big purchases - we'll create digital eReceipts for smaller expenses* that are guaranteed in the case of an IRS audit.	eReceipts make reconciliation easier because the admin does not need to wait for an employee to start collecting receipts.	Fewer receipts to scan at the point of purchase, no more dealing with all that paper!
