Lunge Attack The Onryo moves forward 5ft. and makes a lunge attack with magics. Melee weapon attack, +9 to hit, reach 5ft., one target. Hit: 13(2d6+7) slashing damage.

Arcane Grapple The Onryo attempts to grapple a creature within 5ft. of her. For the contesting checks, The Onryo uses wisdom instead of Strength.

DM's Note: Wherever you plan to have an encounter with The Onryo, there are a few things to keep in mind. First: Make sure you put 7 Arcane Displays in the area, as these serve multiple important purposes. First, the Onryo can teleport to these by using the Teleport action while she is demanifested. When she teleports to one of these, any creatures within 15ft. of it, they gain a point of condemned. Condemned doesn't do anything until a creature has 7 points of it, at which point they can be reduced to 0 HP by The Onryo's Inexorable Stare. In this ability's original in game form, this ability kills a person outright. If you wish to, you can have this ability kill characters instead of reducing them to 0 HP. Additionally, creatures can interact with Arcane displays. They can remove the rune that powers it, preventing The Onryo from teleporting to that display until it has been delivered to it's destination: The furthest display from their current location. While creatures hold this rune however, they gain 1 point of condemned at the end of their turn. Once they have delivered the rune to it's destination, they lose 4 points of Condemned.
