01/2009 – 06/2009:   **Sun Solaris Specialist**
company #6, location

- System-Management of 70 Sun-Systems running Solaris 10
- Configuration von high-availability services with Sun Cluster 3.2
- Performing system related Security-Audits and compilation of a result-based
  action plan
- Designing a user- and patch-management for all systems
- Writing and updating the system documentation
- Change- and Incident-Management based on ITIL

01/2008 – 11/2008:   **Software Support Engineer**
company #5, location

- Set up of the Support's Server-Infrastructure incl. Virtualization with VMware-Server
- Designed a backup systems for virtual machines based on snapshots
- Introduced the Ticket-System OTRS for managing support requests
- Introduced the Monitoring-System Nagios for system monitoring
- Developed a Minimal-Linux (based on CentOs) for confined
   execution of a virus scanner inside a virtual machine
- Administered the MS Virtual Server running Windows Server 2003
- Script programming in Perl, Shell and Python

10/2005 – 12/2007:   **IT-Consultant**
company #4, location

- Administered 180 Sun-Systems running Solaris Versions 8, 9 and 10
- Administered Linux-Blade-Servers running SuSE Linux Enterprise 9 and 10
- Introduced the software "Sun Update Connection" for effective Patch-
   and Package-Management on Solaris and Linux
- Software-Packaging for Solaris and Linux (.pkg and .rpm)
- Expanded the System-Monitoring running BigBrother
- Analyzed Security-Audit-Protocols and compiled result-based action plans

01/2004 – 02/2005: **Administrator Netzwerke / Entwickler Wireless LAN**
company #3, location

- Developed a Wireless-VPN-Routers running embedded Linux
- Administered and expanded the Platform Hamburg-Hotspot.net
- Administered the internal Windows 2000 servers incl. MS SQL Server 2005
- Administered the office network with Windows XP Workstations
- Setup a dedicated VPN-Server for remote access (IPSec with X.509-Certificates)
- Setup an Intrusion-Detection-System running Snort
- Consolidated all registered Internet-Domains to one service provider

11/2000 – 12/2003: **Administrator Systems**
company #2, location

- Administered Sun Solaris 8 and Red Hat Linux servers in Germany and the UK
- Setup a System-Backup infrastructure running Amanda
- Introduced Nominum FMC software for IP-Address management
- Designed and administrated multiple DNS-Servers running BIND and djbdns
- Designed and administrated multiple Mail-Servers running qmail
- Supported customers which were reported to abuse due to open relay, open proxy, etc.
- Administered the office network with Cisco switches and Red Hat workstations

09/1999 – 11/2000: **Network Engineer Access**
company #1, location

- Administered and expanded the nation-wide dial-up infrastructure
- Capacity management and -planing with MRTG
- DNS- and Mail-Server-Administration running BIND and qmail
- Technical support for home and business customers

Certifications

Red Hat Certified Engineer (RHCE)
- Installing Linux-Systems (manually and fully automated)
- Configuring network services like HTTP, FTP and more
- Volume-Management, file systems and encryption

Linux LPI Level 3 Core and Security
- Planing, implementation and maintenance of heterogenous networks
- Server-Administration (Samba, Web server, eMail, Firewall, etc.)
- System security including SELinux

Cisco Certified Network Associate (CCNA)
- Installing and configuring Cisco routers and switches
- Troubleshooting in LAN, VLAN and WAN issues (based on OSI model)

Sun Certified Solaris Administrator (Versions 9 and 10)
- System- and software installation
- System security and maintenance

Sun Certified Solaris 10 Security Administrator
- System- and network security in Solaris 10
- Managing services and zones in Solaris 10

Sun Certified Cluster 3.2 Administrator
- Designing and installing cluster environment with Solaris and Sun Cluster
- Adding third-party software to the cluster environment

CompTIA Security+
- System- and network security
- Digital signatures, encryption and VPN

ITIL Foundation V3
- Service Management

Trainings

Web-Security
- SQL-Injection, Cross-Site-Scripting, Webservice vulnerabilities
- Secure programming of CGI applications

Introduction to ITIL
- Terms and processes
- Change Management

Sun Fire High-End server administration
- Sun Fire 12K/15K server architecture
- Managing and troubleshooting on the Sun Fire 12K/15K platform

Veritas Storage Foundation for UNIX
- Setup of Veritas Volume-Manager and filesystems
- Using the Volume-Manager on UNIX systems

Education

09/1997 – 08/1999:   **Fachhochschulreife**
some school, some place

07/1990 – 08/1997:   **Gymnasialer Zweig**
some school, some place

Skills

Languages: english (fluent)
french (very basic)

Drivers License: EU-Class B (Car available)

Hobbies

Traveling, Curling, classic and modern Cinema
