

AMX Performance Monitor Output

Blue - Duet Memory

Orange - CPU Utilization

1. Start of First Update, Attempt 1
2. Start of First Update, Attempt 2
3. I thought I had it here, it returned to first attempt memory level
4. Second Update, Attempt 1
5. Second Update, Attempt 2
6. Waited a long time hoping memory utilization would return to baseline
7. Third Update, Attempt 1
8. Third Update, Attempt 2
9. Fourth Update, Attempt 1
10. Fourth Update, Attempt 2
11. Fifth Update, Attempt 1
12. Fifth Update, Attempt 2
13. Java Out of Memory Error

July 22, 2013 12:45 pm

I thought that my problem was caused by unreleased Listeners, so I added code to release Listeners before Updater Threads were (hopefully) killed. Not sure if Threads are actually being killed or not. What is curious is step 3, which was not happening before I added this code to release listeners. All updates are started manually.
