

AMX Performance Monitor Output

Blue - Duet Memory

Orange - CPU Utilization

1. Start Update 1, Sites 1-10 of 30, Attempt 1
2. Update 1, Sites 11-20 of 30, Attempt 1
3. Update 1, Sites 21-30 of 30, Attempt 1
4. Update 1, Sites 1-10 of 30, Attempt 2. You can't see it at this resolution but memory spikes down and back up at the start of each attempt until the end of the Update sequence.
5. Update 1, Sites 11-20 of 30, Attempt 2
6. Update 1, Sites 21-30 of 30, Attempt 2
7. End of Update 1
8. Start Update 2, Sites 1-10 of 10, Attempt 1
9. Update 2, Sites 1-10 of 10, Attempt 2
10. End of Update 2
