## Notes:

1) Perform a warm-up BEFORE and stretching AFTER each workout.
2) Perform all movements in the order they appear.
3) All movements are meant to be performed in "superset" fashion. Perform both movements in the superset, then take the prescribed rest.
4) Perform a minimum of 3 , and a maximum of 5 supersets.
5) Attempt to achieve the high-end of the rep/time range whenever possible (while maintaining good technique).
6) Rest 30-60 seconds between supersets.
7) Perform ALL supersets in a pairing before moving to the next pair of supersetted exercises.
8) Exercises should be performed as quickly as possible, maintaining proper technique.
9) If resistance (other than body weight) is used for a given exercise, select a weight that allows you to move through the range of motion quickly, with good technique. When this resistance is no longer a challenge, increase the weight to the next increment.
