▼ Budget Table

Add Question ?

Budget*

Please use the table below to itemize the budget for the program, project, or operating expenses supported by this request. Refer to our Community Grants Grant Seeker Session for additional guidance on budget line items.

Budget Expense Category
Select the category that best fits each expense. If none of the available categories accurately describe an expense, please contact our team for guidance before submitting your application.

Total Budget Column
Enter the full cost of each expense associated with this request, regardless of how it will be funded. This column should reflect the total cost of the program, project, or operating expenses included in this request.

Allocated to This Request Column
Enter only the portion of each expense that will be funded through this grant request.

General Operating Support Requests
If you are requesting general operating support, include only the expense categories where grant funds will be used. In the Total Budget Column, enter the anticipated annual cost for each expense category during the grant period. In the

Allocated to This Request Column, enter the amount of grant funding requested for that category.

Example:

If a program costs \$50,000 to operate and you are requesting \$10,000 from the Community Foundation:

- Total Budget = \$50,000
- Allocated to This Request = \$10,000

Notes:

- Enter numbers only. Do not use dollar signs (\$), commas, or other symbols.
- If the table is not calculating correctly, verify that all entries contain numerical values only.
- The Total Budget and Allocated to This Request columns should only match if the grant request will fund the entire expense or project budget.

Add Question

Budget Narrative

Everyone

Your **Use of Funds** response should generally explain the expenses included in the budget table and how grant funds will be used. Use this space only if additional budget explanation or context is needed.

When providing additional budget details, please reference the corresponding budget line item(s) to help reviewers connect your explanation to the budget table.
