Hub

Comes to You

# **#AnaplanHub**

Abstract geometric shapes in various shades of blue, including triangles, rectangles, and parallelograms, scattered across the left side of the slide.

# Designing for Performance

**David Smith**

Vice President  
Operational Excellence Group

**Cianna Bramley**

Model Analyst  
Operational Excellence Group

# Objective

- Define Anaplan standards and best practices content and evangelise the “The right way to model”
- Work with Product Management to test and define best practice for new product capabilities
- Have better models in the field!

**P** - Performance

**L** - Logical

**A** - Auditable

**N** - Necessary

**S** - Sustainable

**Performance** - How do the structures and formulae impact the performance of the system?

**Usability/Auditability** - Is the user able to understand how to interact with the functionality?

**Sustainability** - Can the solution be easily maintained by model builders and support?

# Module Design

Data

Transaction / Source data  
Data Hub

Inputs

Design for user entry  
Don't mix with calculations and outputs

System

Time management  
Mappings / technical modules

Calcs

Optimise for performance  
Group like calculation structures together

Outputs

Reports  
Only data flows in

# Dimension Order

Consistency of  
ordering of  
dimensions affects  
calculation speed

## Applies to: Products, Customers

PRICES	Customer 1	Customer 2	Customer 3
Product 1	15	11	8
Product 2	13	12	9
Product 3	10	13	10

## Applies to: Customers, Products

VOLUMES	Product 1	Product 2	Product 3
Customer 1	100	200	300
Customer 2	400	500	600
Customer 3	700	800	900

$$\text{REVENUE} = \text{PRICES} * \text{VOLUMES}$$

Indexes are created for each “cell”

PRICES	Customer 1	Customer 2	Customer 3
Product 1	1	2	3
Product 2	4	5	6
Product 3	7	8	9

VOLUMES	Product 1	Product 2	Product 3
Customer 1	1	2	3
Customer 2	4	5	6
Customer 3	7	8	9

# PRICES

Prod	Cust	Index	Value
1	1	1	15
1	2	2	11
1	3	3	8
2	1	4	13
2	2	5	12
2	3	6	9
3	1	7	10
3	2	8	13
3	3	9	10

# VOLUMES

Prod	Cust	Index	Value
1	1	1	100
2	1	2	200
3	1	3	300
1	2	4	400
2	2	5	500
3	2	6	600
1	3	7	700
2	3	8	800
3	3	9	900

# REVENUE

Prod	Cust	Value
1	1	1500
2	1	2200
3	1	
1	2	4400
2	2	6000
3	2	
1	3	5600
2	3	7200
3	3	

## Align dimension order and Indexes are now also aligned

PRICES	Customer 1	Customer 2	Customer 3
Product 1	1	2	3
Product 2	4	5	6
Product 3	7	8	9

VOLUMES	Customer 1	Customer 2	Customer 3
Product 1	1	2	3
Product 2	4	5	6
Product 3	7	8	9

# PRICES

Prod	Cust	Index	Value
1	1	1	15
1	2	2	11
1	3	3	8
2	1	4	13
2	2	5	12
2	3	6	9
3	1	7	10
3	2	8	13
3	3	9	10

# VOLUMES

Prod	Cust	Index	Value

Avoid Traffic

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Summer Promo						✓	✓	✓				
Winter Promo	✓											✓

```

IF Winter Promo THEN
    TIMESUM(xxxx)
ELSE IF Summer Promo THEN
    TIMESUM/yyyy)
ELSE 0

```

Calc Time: 10 sec

OR

```

IF NOT Summer Promo AND
NOT Winter Promo THEN 0
ELSE IF Winter Promo THEN
    TIMESUM(xxxx)
ELSE TIMESUM/yyyy)

```

Calc Time: ~ 5 sec

Or even more optimal?

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Summer Promo						✓	✓	✓				
Winter Promo	✓											✓
No Promo		✓	✓	✓	✓				✓	✓	✓	

**Put most  
common  
expression  
first**

```
IF No Promo THEN 0
ELSE IF Summer Promo THEN
TIMESUM(yyyy)
ELSE TIMESUM(xxxx)
```

**Break  
it  
up!!**

**Calc Time: ~ 4 sec**

# Other Examples

```
IF ISNOTBLANK(TEXT)  
THEN  
  FINDITEM(LIST,TEXT)  
ELSE BLANK
```

**OR**

```
IF BLANK(TEXT)  
THEN BLANK  
ELSE  
  FINDITEM(LIST,TEXT)  
(if there are more blanks  
than text items)
```

# Other Examples

LAG(X, Y, 0)

**Becomes**

IF Y=0

THEN X

ELSE

LAG(X, Y, 0)

**(If Y is often 0)**

# Other Examples

```
IF SALES>0  
THEN TRUE  
ELSE FALSE
```

**Becomes**

```
SALES>0
```

Abstract geometric shapes in various shades of blue, including triangles, rectangles, and parallelograms, scattered across the left side of the slide.

Reduce the number of calculations

# Sales Volume: Dimension Hierarchies

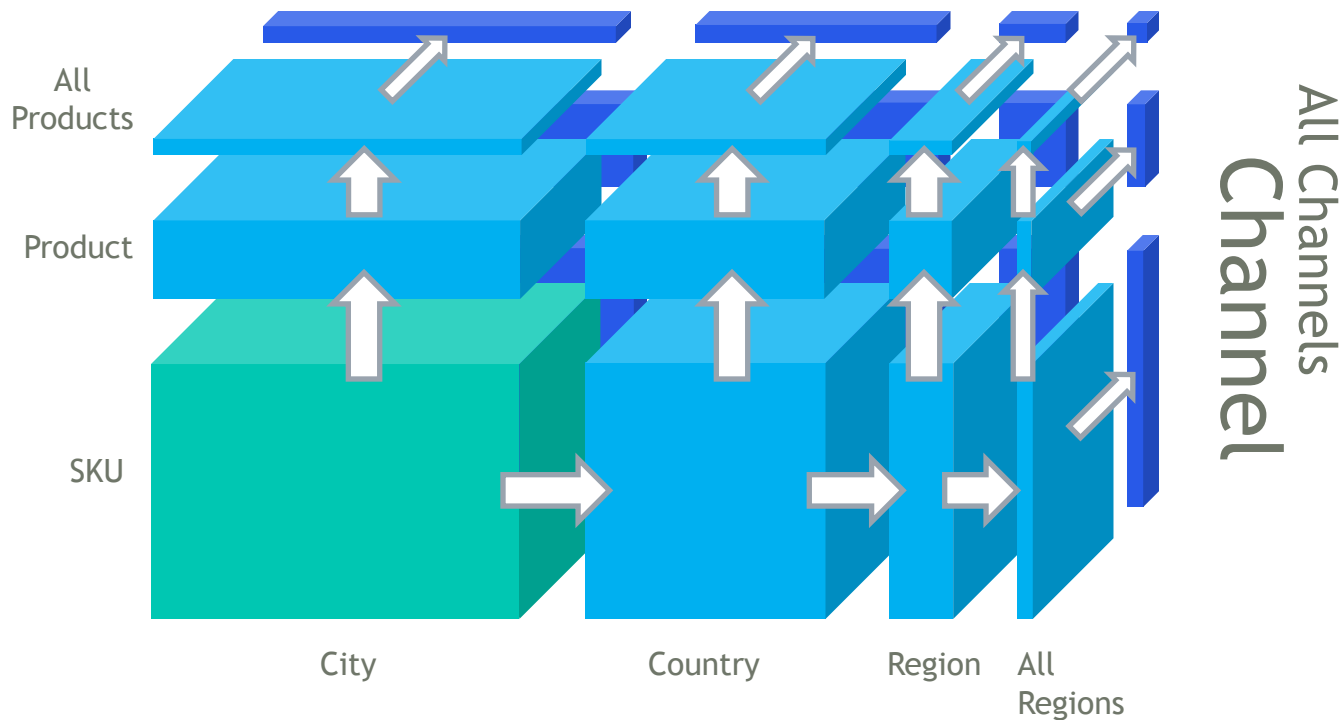

Sales Volume has 3 dimension hierarchies: Region by Product by Channel  
Region has 4 levels, Product has 3 levels, Channel has 2 levels

Region Hierarchy	Product Hierarchy	Channel Hierarchy
City	SKU	Channel
Country	Product	All Channels
Region	All Products	
All Regions		

Engine partitions on every combination of levels

Total # blocks for Sales Volume =  $4 * 3 * 2 = 24$  blocks

# Sales Volume: Aggregations

# Real-time model building workshop using the Anaplan platform

## Decision-making in your hands

### Date

23<sup>rd</sup> May or 18<sup>th</sup> July

### Location:

138 Holborn, London, EC1N 2SW

Register today!

### Call

01628 321454

### Visit

[anaplan.com/events/real-time-model-building/](https://anaplan.com/events/real-time-model-building/)

Join our interactive workshop to learn exactly what connected planning is and how it can transform the way you collaborate around your plans.

**Bring your laptop and get hands on.**

**In just a few hours, you will learn how to:**

- **Build** a business model from scratch in Anaplan
- **Reduce** your planning processes from weeks and months down to days and hours
- **Improve** transparency by involving more staff and business stakeholders in the planning process

In addition to the time at the workshop you'll have another four weeks of free access to Anaplan.
