Install Dataiku on Mac

Dataiku can be installed directly on Mac OS 10.9 and later. Follow the steps below.

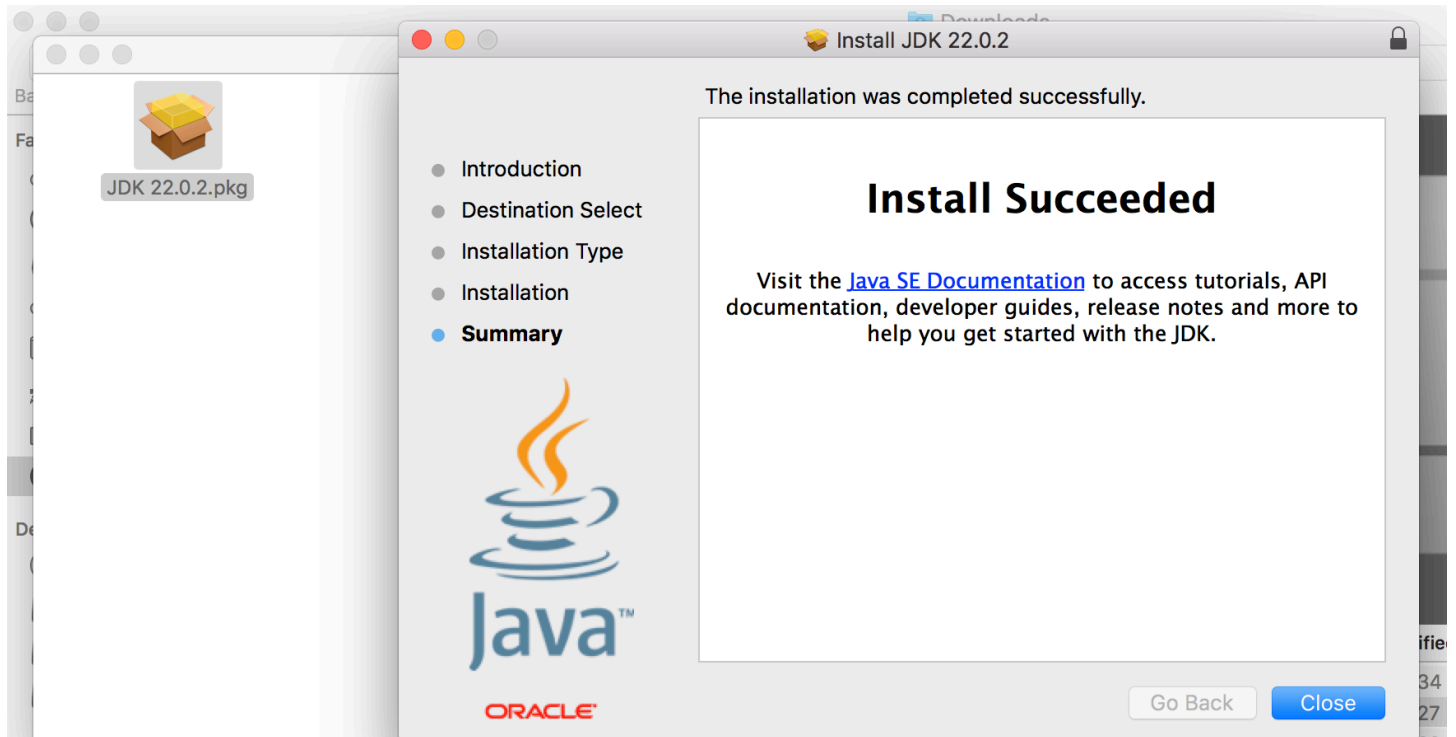

I have tried to install the Dataiku dmg file 😊

Dataiku website clearly states that the software supports mac

As per the instructions given by the support team, i have tried to install Java via x64 DMG Installer

After successfull installation of Java as below :

As per the steps given by your team , run the below command on the terminal :

```
/usr/libexec/java_home -V
```

Got the below message 😊
