

## Adding the Verisign Logo to a Donation Page

- 1) Navigate to the “Design Donor Screens” page of your Donation Page (step 3 of the Process Navigator for any donation form)
- 2) Edit the Donation Form
- 3) On the next page, in the “Select data elements to include in this form” page, select “HTML Caption” and add it to the form
- 4) Then edit the Data element and in the HTML Content page put the following code:
  - a. `[[S66:payment/verisign_seal.tpt]]`
- 5) Save

**Additional Points:** You can have a special PageWrapper just for donation forms with the logo imbedded in the wrapper (or conditionalize its appearance in the wrapper based on a specific page) and if you try to put the logo on non-secure pages it will not appear.

1. Identify Donation Form

2. Configure Donation Levels

3. Design Donor Screens

a. Donation Form

4. Validate

5. Configure Autoresponders

6. Test Drive

7. Publish

Warning!

The form you are editing is either published or scheduled to be published automatically!

The Form Designer shows the data elements that are already on your form in the window at the right; additional data elements that you can add are shown in the window at the left. Select a data element to Add, Remove, or Reorder it. Use the lower portion of the page to Edit and Preview a selected element after saving it. Use the Preview button to preview the entire form.

Select data elements to include in this form:

- Shipping Suffix

- Shipping Email

- Shipping Phone

- Shipping Street 1

- Shipping Street 2

- Shipping City

- Shipping State/Province

1. HTML Content:

Enter content to display to the donor. You can include text, images, personalized content, and links. (Use links with care so you do not lead donors away from your form.) Note that this section of content will expand to fit the entire width of the donation form.
